

1. Guess the Number Game

- Step 1: Ek variable banao jisme computer random number generate kare (1 se 10 tak).
- Step 2: Ek loop banao jo 3 attempts allow kare.
- Step 3: Har attempt me user se number lo (prompt).
- Step 4: Check karo agar user ka number secret number ke barabar hai → win message dikhao.
- Step 5: Agar number chhota hai → 'Too Low' print karo.
- Step 6: Agar number bara hai → 'Too High' print karo.
- Step 7: Agar 3 attempts ke baad bhi correct guess nahi hua → 'You lost' print karo.
- Step 8: End me total attempts aur secret number show karo.

2. Dice Game (Player vs Player)

- Step 1: User se rounds ka number lo.
- Step 2: Do variables banao player1Score aur player2Score ke liye.
- Step 3: Loop chalao rounds ke hisaab se.
- Step 4: Har round me dono players ke liye random dice number generate karo (1–6).
- Step 5: Compare karo dono numbers:
 - Agar player1 ka number bada hai → player1Score++
 - Agar player2 ka number bada hai → player2Score++
 - Agar dono equal hain → 'Draw' print karo.
- Step 6: Loop ke baad dono players ke scores print karo.
- Step 7: Check karo kaun jeeta ya match draw hua.

3. Rock Paper Scissors Game

- Step 1: User se input lo (rock, paper, scissors).
- Step 2: Input ko lowercase me convert karo.
- Step 3: Check karo agar input valid nahi hai → 'Invalid input' print karo.
- Step 4: Ek array banao jisme ['rock','paper','scissors'] ho.
- Step 5: Computer ka random choice generate karo.
- Step 6: Compare karo user aur computer choice:
 - Agar dono same → 'Draw'
 - Agar user jeet raha hai → 'User won'
 - Warna → 'Computer won'
- Step 7: Dono choices aur result print karo.
